

I use xm radio's Instant Traffic & Weather stations while travelling up and down the east coast and in the mornings around Boston. It is convenient and easy to use, without having to skip through many stations just to find a local weather/traffic report in areas where I don't know the local radio stations.

I believe that the NAB's petition 04-160 should be rejected. XM and other satellite radio providers should be allowed to provide the services and programming that their customers want.

Thank you,
John Lund
